WORK EXPERIENCE

Coca-Cola HBC | Azure DevOps Engineer **04.2026 - Present**

New Cairo, Egypt (Hybrid)

- Designed and maintained enterprise YAML CI/CD pipelines and deployment templates in Azure DevOps, accelerating delivery velocity by 45% and reducing failures by 35%.
- Automated workflows with PowerShell, Bash, and REST APIs, integrating Azure DevOps with ServiceNow and Power BI to synchronize telemetry and save 25+ hours weekly.
- Administered Azure DevOps organizations, repos, service connections, and RBAC across 15+ engineering teams, standardizing IaC configurations to 99.5% compliance.
- Orchestrated release processes across environments, conducting systematic root cause analyses (RCA) and dashboards that cut MTTR by 50% with 99.9% uptime.

IQVIA | DevOps Engineer **03.2025 - 04.2026**

New Cairo, Egypt

- Led end-to-end infrastructure migration for a government healthcare system serving 4M+ users across staging and production, provisioning 42+ servers and migrating 500GB+ databases within 3 months.
- Migrated a custom on-premises datacenter to Microsoft Azure within 1 month, configuring 6 core servers, firewalls, load balancers, and 20+ services for high availability.
- Engineered centralized CI/CD pipelines and GitOps workflows using Jenkins, ArgoCD, and Ansible across 200+ hybrid Linux servers, cutting deployment time by 65%.
- Deployed Grafana, Prometheus, and the ELK Stack to monitor 20+ critical applications and Kubernetes clusters, managing 15,000+ log events/min and driving MTTR reduction.
- Provided 24/7 on-call production support (resolving 50+ P0/L2 incidents with <30 min MTTR); ran monthly DR drills and runbooks that reduced repeat incidents by 40%.

Transforma Studios | Software Engineer L3 **03.2024 - 12.2024**

New York, United States (Remote)

- Architected high-throughput backend microservices and RESTful APIs using .NET, C#, Go (Gin, GORM), PostgreSQL, EF Core, and Redis, ensuring sub-second response times.
- Architected data models and backend services for an academic platform, enabling course management, office hours scheduling, and administrative workflows.
- Built real-time stock processing engine using RabbitMQ and Go, integrated OpenAI APIs for automation, and deployed zero-downtime Kubernetes services via Traefik.

3Sixty | DevOps & Systems Engineer **08.2023 - 01.2024**

Georgia, United States (Remote)

- Developed NetSuite process automations via SuiteScript 2.1 API, delivering a 60x acceleration in billing cycles and financial report generation.
- Engineered real-time uptime monitoring portal (status.3sixtydental.com) and led full-stack engineering of a QMS platform with Vue.js and Go (GORM).
- Managed multi-cloud infrastructure across Azure, AWS, and GCP, optimizing resource provisioning, cloud spend, and automating HR data synchronization.

EDUCATION

Future Academy | Bachelor of Computer Science **2019 - 2023**

Cairo, Egypt

- GPA: 3.24 / 4.0 | Graduation Project: Excellent (A+) | Head of DevOps Engineer at Google Developer Student Clubs (GDSC FA) for 2 years.

SKILLS

DevOps & CI/CD: Azure DevOps (Pipelines, Repos, Boards, Artifacts), YAML Pipelines, CI/CD, Jenkins, GitHub Actions, ArgoCD (GitOps), Helm, CircleCI

Automation & Scripting: PowerShell, Bash Scripting, Python, REST APIs, Workflow Automation, Platform Administration

Cloud & Infrastructure as Code: Microsoft Azure, AWS, GCP, Infrastructure as Code (IaC), Terraform, Azure Bicep, Ansible, CloudFormation, Cloud Operations

Enterprise Tools & Observability: ServiceNow Integration, Power BI Dashboards, Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), Azure Monitor, Log Analytics

Containers & Platform Engineering: Docker, Kubernetes (AKS/K8s), Traefik, Nginx, Apache Web Server, Linux/Unix Administration, Platform Engineering

Methodologies & Databases: Git, GitFlow, Agile, Scrum, SAFe, DevSecOps, Microservices, RabbitMQ, Redis, SQL (PostgreSQL, MySQL), Database Migration
